READ THEM ONE BY ONE!

LVL SAFE® Single Tube Reader –
for 2D and QR Codes. Rapid scanning
to speed up your workflow.

The SAFE® Single Tube Reader decodes single tubes with 2D codes by placing the tube on the reading window.

Scans single tubes:

- Decodes any Tube size without any configuration in less than a second!
- No software installation required. Just Plug & Play.
- Power supply: No additional cable required – connect your reader to your laptop via USB cable and off you go.

Specs & features:

- **HIGH SPEED DECODING:** Reads all tubes with 2D codes and QR codes in a blink of an eye.
- **NO LICENSE KEY:** No need to type in an unnecessary license key, when using the reader on a new device. Just Plug & Play.
- **ALERTS:** Receive audio and visual alerts with each successful code read (beep and green LED flash).
- **KEYBOARD WEDGE:** Acts as a keyboard, sending characters belonging to a code directly to connected applications when scanned.
- **DATA EXPORT OPTIONS:** Data can be exported via Keyboard Wedge or COM port.
- **COMPACT FOOTPRINT:** Designed with a compact size to fit on a workbench without taking up too much space.
- **1,65-METER USB CABLE:** Provides flexibility and extended reach for connecting to your computer. Plus, convenience of power supply and data export through a single cable.
- **CRYOGUARD TECHNOLOGY:** Cryoguard protects the scanner against frost and condensation when used with cold labware.
